

Quick Tips for "Answers" within an Intellimathics Activity

Created by: Erinn Dobres & Catherine Hunter InterACT 11/06/07

Target Activity: Counting Trucks (Intellimathics 3)

Quick Tip #1:

You can type a statement in the text box requesting students to place multiple objects within the sorting bin.

Put 2 crabs and 1 jellyfish in the ocean.

Quick Tip #2:

If you type a statement in the text box requesting multiple objects to be placed within the sorting bin, you must type every possible answer to that request separating them by semicolons. **DO NOT TYPE SPACES FOLLOWING SEMICOLONS!**

Type all possible answers separating them by semicolons

Properties of Math Tool

Name:

Reporting Options | Answers | Appearance | Snap and Arrange

Enter the answer below as text and/or numbers.
Use semicolons to separate multiple correct answers.

Case Sensitive
 Ignore Spaces

The user's response must:

Match a correct answer exactly
 Contain all the words of a correct answer
 Contain at least one word of a correct answer

The user's response must not:

Contain any of these words:
 Contain any other words except:

Automatically Generate Report Label
 Custom Report Label

Page #1, Sorting Bin #1 |

Disable capturing, checking and reporting for this object

OK Cancel ?

Quick Tip 3:

If the check work button does not give desired feedback within the activity, make sure that you have spelled everything correctly within the textbox, the sorting bin details, and within each button in the picture toolbar. Also, check to make sure that the singular and plural names are spelled correctly within the "Attributes" tab for each button within your picture toolbar. **Everything must be spelled correctly in order for the "Check Work" button to function properly!**

Check to make sure the singular and plural names for each button are spelled correctly
